Physical Palladium Keeps Soaring Amid Massive Uptrend

As our members know, we have long been bullish on palladium. We initially detected a new Long-term uptrend in the **Physical Palladium ETF (PALL)** back on July 15, 2016 with an alert price of \$62.00. Since then, PALL has soared 157%. Our last uptrend alert on PALL came around one year ago, on September 21, 2018, with an alert price of \$99.56. The ETF has jumped 60% since that alert and the uptrend shows no signs of slowing down anytime soon!

China ETF Suffers Big Outflows On Threat Of U.S. Capital Controls

The Selloff In Cannabis Stocks Intensifies

Disappointing profit figures from cannabis firms coupled with a growing health scare over vaping has caused a massive selloff in cannabis stocks. The rally that began in late December hit a near-term ceiling in March and stock prices across the entire industry have largely been contracting ever since. Add to these factors the ongoing political gridlock (and sheer ineptitude) in Washington, and it should be no surprise that the cannabis industry is being avoided right now. For now, we watch and wait for opportunity.

Middle East Meltdown
with Jerry Robinson

Listen Now

With the U.S. on the precipice of a new explosive war with Iran, economist Jerry Robinson digs deeper into the latest provocations rocking the Middle East. In his usual "follow the money" style, Jerry gets straight to the heart of the matter and reminds his listeners that the petrodollar system lies at the heart of U.S. foreign policy.

Buckle up for this hard-hitting show that exposes the truth about America's true intentions in the Middle East.

TRADING IDEA: This ETF Could Jump If Stocks Pull Back This Week

The **ProShares Short S&P 500 ETF (SH)** is an inverse ETF that offers a simple way to speculate on lower prices in the S&P 500 Index. The ETF is designed to rise 1% for every 1% that the S&P 500 falls.

With the U.S. stock market trading near all-time highs (and therefore SH trading near all-time lows), this setup could potentially offer an interesting and profitable hedge if the market begins to move down in the coming days or weeks.

SH is currently trading just above a new all-time low even as rising fears of a recession, global trade uncertainty, and Presidential impeachment proceedings loom on the horizon. Further complicating matters for U.S. stocks is that we are now in the most dangerous time period of the year, historically speaking, for U.S. stock performance.

While U.S. stocks may continue higher here, SH could be a compelling hedge that offers a high potential reward for a relatively small risk. Now, SH is trading just above key support levels with a new Swing uptrend in view just overhead.

ACTION: We will look to add shares of SH to our Daily Trading model portfolio as a short term swing trade if the trigger price of \$26.43 is reached, with a maximum buy price of \$26.75. If triggered, we will immediately place an initial stop-loss order at \$25.68.

BOOK: Bankruptcy of our Nation

76

★★★★★ **Very informative and helpful!**

August 16, 2016

Format: Kindle Edition | **Verified Purchase**

For all of my working life I have attempted to earn more than an average income. While supporting a large family, it was always difficult to develop enough discretionary income to invest or build a business, even though I attempted to do so a few times, with little success and a loss of needed retirement savings. I am now newly retired with enough income to make ends meet, but not by much. This book has given me new hope and a much more in-depth understanding of financial concepts that I've never fully understood until this reading. I intend to begin implementing the principles taught by Mr. Robinson, that will allow me to improve my retirement and financial future. This book has been a wealth of great information and above all was easy to read and understand.

Eric Altergott

Reserve Your Seat

As central banks increasingly turn to negative interest rates to battle slowing economic growth, they are also stockpiling physical gold at a rate unseen in decades. So too, many retail investors are turning to physical gold as a hedge against rising investment uncertainty. Is physical gold still a good long-term investment today? And what about other precious metals, like silver, palladium, and platinum? In this **special 30 minute live online event**, we will explore those topics and more with precious metals advisor **Tom Cloud**. With more than 40 years of experience in the precious metals industry, Tom will deliver his insider's perspective and outlook on gold, silver, palladium, and platinum.

Register now to reserve your free seat at this upcoming live presentation, which is a part of **Followthemoney.com's Lunch and Learn series.**

MARKET TRAKKER

TRACKING THE TREND IN U.S. STOCKS SINCE 2007

UPDATED EVERY WEEKEND

Market Commentary by Jerry Robinson

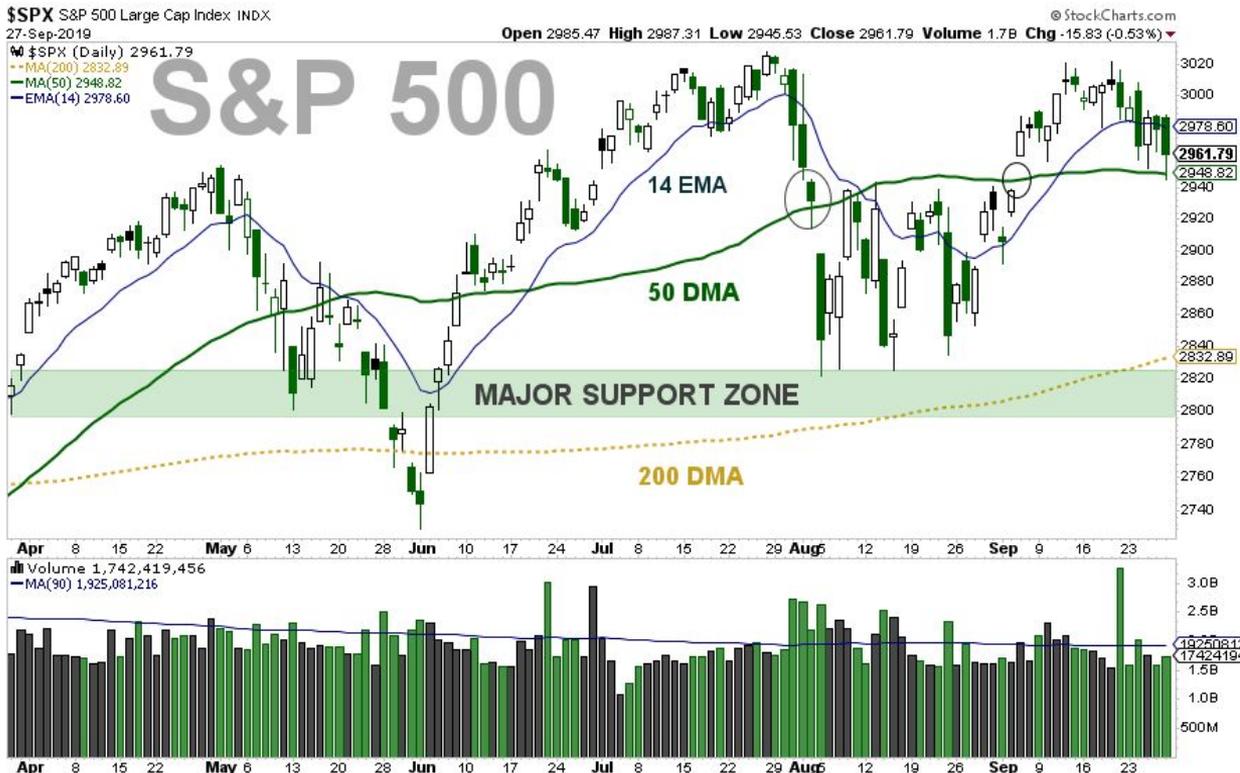

The S&P 500's Position uptrend is fully intact as it sits just below a new all-time high and is supported by a Long-Term uptrend. The S&P 500 index slipped 0.8% last week amid more uncertainty over U.S.-China trade relations and a growing threat of impeachment raised against President Trump. A newly released whistleblower complaint lodged against the White House alleged a cover-up of potentially impeachable offenses that included a secret server and other shenanigans. The complaint led the Democratic House to launch an official impeachment inquiry against the President, though the markets were relatively unmoved by the politically-charged events. However, U.S. stocks did selloff late on Friday after the White House signaled it was weighing a plan to place strict capital controls on U.S. investors that would restrict investment flows into China and that could lead to the delisting of Chinese stocks from U.S. stock exchanges. The index closed at \$2961 on Friday, around 2%... [\(Keep reading\)](#)

S&P 500 Holds 50 DMA Support After Failing At \$3025 Resistance

The S&P 500's Position uptrend is fully intact as it sits just below a new all-time high and is supported by a Long-Term uptrend.

The S&P 500 index slipped 0.8% last week amid more uncertainty over U.S.-China trade relations and a growing threat of impeachment raised against President Trump.

The index closed at \$2961 on Friday, around 2% below its former all-time high of \$3025 reached in late July. Year-to-date, the index has risen more than 18%. [Read more](#)
